# Sheng Rong

AI Full Stack Engineer  
San Francisco Bay Area

## Summary

Hi, I am Sheng Rong. I am an AI fullstack engineer based in Las Vegas, with a background in computer science and over 8 years of experience in building web applications and AI-powered applications.

I started my career in front-end game development, contributing to a title that generate over \$2m in monthly revenue. Later, I founded SFMeal.com, where I designed and built a platform connecting private chefs with customers, gaining hands-on experience with full-stack technologies like React, Node.js, MongoDB, AWS and docker.

More recently, I've focus on AI systems --- designing multi-agent architectures for interactive narrative games at Pominis, and developing AI-driven health and productivity tools with Next.js, Firebase and GrapgQL. I have a strong passion for building scalable, user-centric productsm cobining technical depth with an entrepreneurial mindset.

I'm excited to bring my expertise in AI, full-stack engineering, and prodcut innovation to a dynamic team and contribute to impactful projects.

---

## Experience

Pominis

AI Fullstack Engineer

February 2025 - Present (3 months)

San Francisco Bay Area

- Designed a multi-agent AI system for an interactive narrative game, doubling story generation capacity and reducing failure rate by 90%.

- Built a React-Flow-based editor tool for creators to design customizable story nodes (characters, storylines, genres) with continuous AI generation.

- Integrated tool-calling features with database manipulation to ensure seamless AI-data interaction and maintain integrity.
- Architected a scalable JSON structure on Firebase Realtime Database to support dynamic story branching and offline data persistence.

Live Demo (<https://pominis-react-flow.vercel.app/storylist>)

## TomatoSMS

Full Stack Engineer

June 2024 - Present (11 months)

San Francisco Bay Area

<https://tomsms.com>

Build an AI-Copilot to help users meet their daily diet and drinking goal.

1. Built a dynamic chart (Next.js, TailwindCSS, Chart.js) to visualize AI-generated insights about calorie consumption and burning.
2. Collaborated with the design team to ensure seamless UI/UX integration, focusing on mobile-first and fast-loading page performance.
3. Utilize WPGraphql and SSR to implement a Wordpress Blog System with SEO optimization

## OPeach

Full Stack Engineer at OPeach Studio

December 2022 - March 2025 (2 years 4 months)

Daly City, California, United States

PFRRange: show the range of push-or-fold in a Nolimit-holdem tournament game with customize input (chips, position) (<https://effortless-yeot-47139d.netlify.app>)

Skills: Redwood.js, Chakra UI

CoverletterHelper: An AI-powered cover letter helper that personalizes content by analyzing a user's resume and job description prompts. (<https://cover-letter-helper-mpl2.vercel.app/home>)

Skills: Prompt, Firebase auth and realtime database

## A Hollow Place - Mysteries Game Club

Full Stack Engineer

April 2022 - December 2022 (9 months)

Daly City, California, United States

<https://www.ahollowplace.com>

1. Develop full-stack web applications using RedwoodJS, including dynamic routing, layout design, and component development.
2. Build and test UI Components in Storybook.js and Jest.js with the collaboration of a designer, to ensure the UI components are designed well and thoroughly tested.
3. Developed the web-app on a database-as-a-service Railway and deployed in a serverless env on Netlify Functions, resulting in better cost efficiency, ability to handle real-time data processing, and reduced deploying time.
4. Experienced in developing with GraphQL and Prisma, including schema design, data modeling, and database management, greatly reduced development time.

## SFMeal

Full Stack Engineer

November 2015 - June 2021 (5 years 8 months)

San Francisco

SFMeal is a platform that feeds you authentic Chinese dishes from individual chefs from China.

1. Build an online ordering platform with SailJS and MongoDB, making it convenient for customers to enjoy a wide variety of Chinese dishes prepared by private chefs.
2. Implemented best practices of payment, including integrating Stripe API to collect a payment, utilizing Stripe's tokenization system to store sensitive information securely, using Stripe's Connect Platform to facilitate automatic payouts to our partner chefs, and using Stripe's testing env to test the integration.
3. Implement an Elastic Load Balancer (ELB) to distribute incoming traffic across EC2 instances for load balancing and fault tolerance, S3 buckets for static and users' uploaded contents and Route53 for DNS management.

## Plenry

Lead Front-end Engineer

October 2014 - March 2015 (6 months)

Sunnyvale

Lead an engineer **team of three** to build a web application with ExpressJS, BackboneJS, and MongoDB.

- Integrated social platform APIs using Hello.js, enabling seamless interaction with third-party platforms and enriching our user experience.
- Collaborated with UI/UX designers to ensure a seamless user experience.

---

## Education

Shanghai Maritime University

Bachelor of Science (BS), Computer Science · (2010 - 2014)
